Select the survey with the questions that best suit your needs. There may not be a perfect fit, so you should try to find the closest fit. The examples of programs that each survey may suit are only suggestions – at this stage in the development process we would like to hear what types of programs you find these surveys useful for, and all field testers will be asked to provide feedback.

The responses for questions 1-4 are on a 5-point Likert scale, where 1 = strongly disagree and 5 = strongly agree, with an additional option of N/A. Questions 5 and 6 are open-ended.

These are immediate surveys, intended for distribution right at the end of a program or other interaction. The final version of the toolkit will also include follow-up surveys.
